

BabyDollBSC

Whitepaper

The project

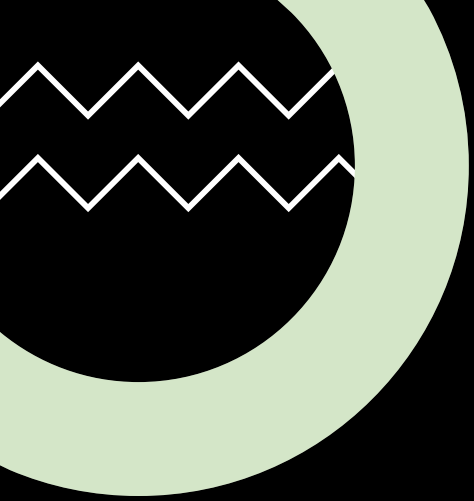

Babydoll is a brand new token that encourages investors to buy and hold: porn giveaways will be made on a daily basis to holders.

Our short term goal is to reach a high market cap encouraging investors to buy more and hold by rewarding them with giveaways on their favourite porn platform.

As we raise enough funds, we'll implement the first hentai nft marketplace, where investors will be able to pay for hentai nft through \$BabyDoll tokens.

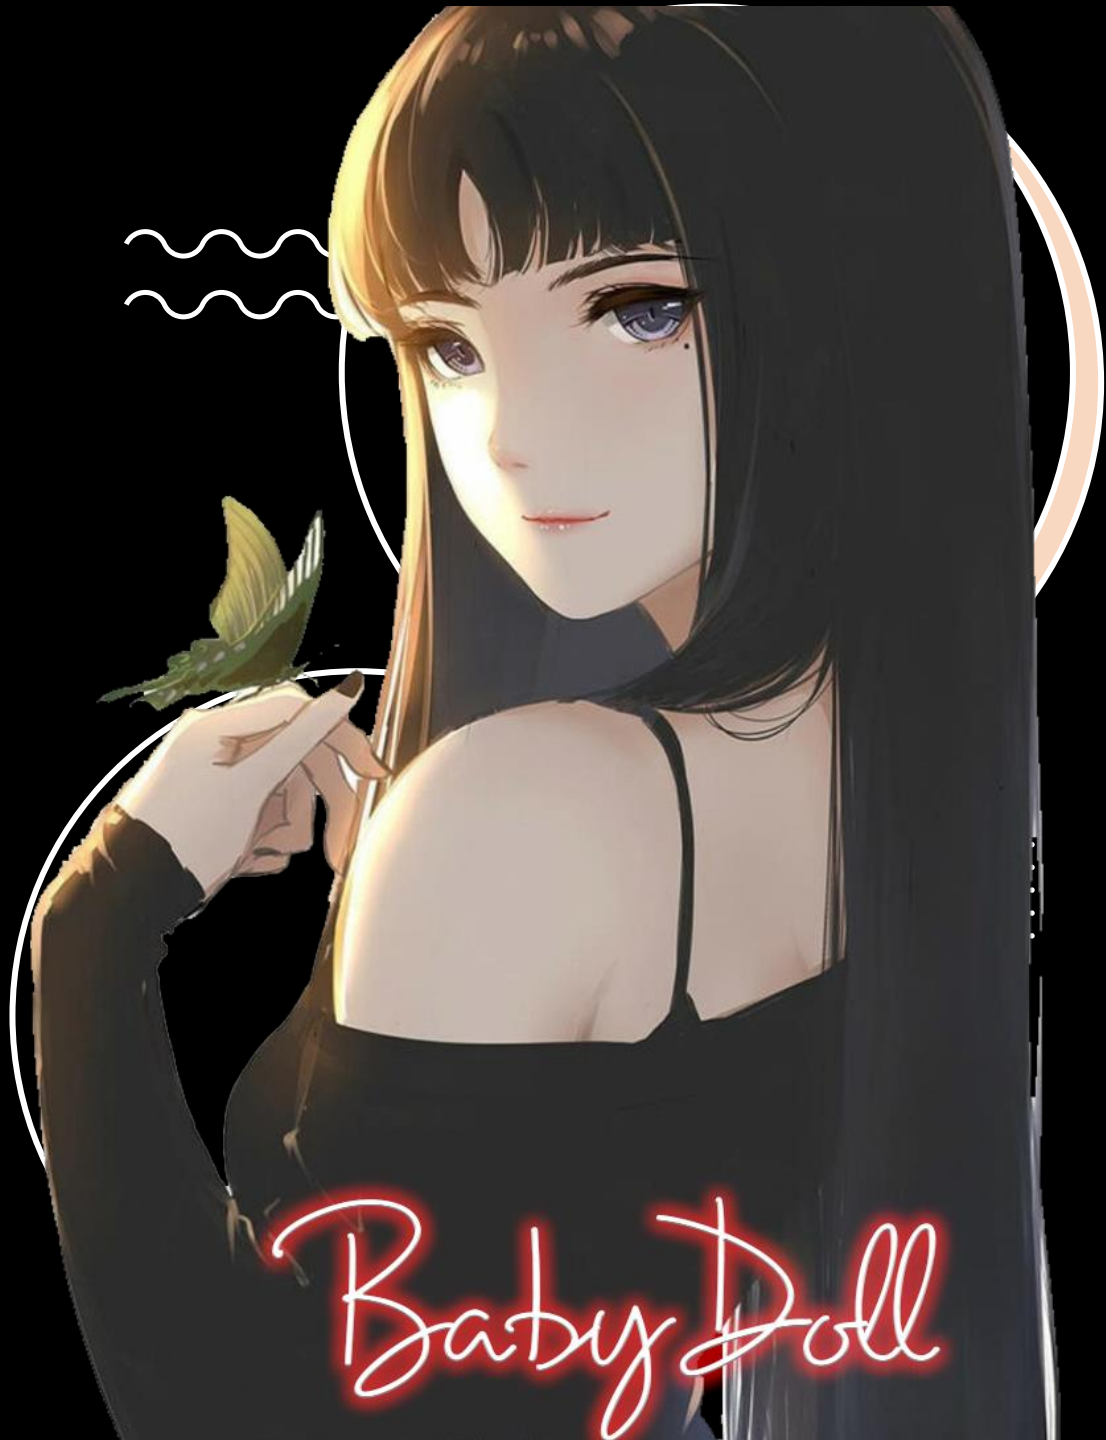

Tokenomics

- 10% fees applied on every transaction:
- 5% fee is redistributed to all the holders
- 2% fee is put aside for marketing and promotion
- 3% fee is burnt
